SUPPLEMENTARY INFORMATION: The Commission may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501-3520), the FCC invited the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology. Pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107-198, see 44 U.S.C. 3506(c)(4), the FCC seeks specific comment on how it might "further reduce the information collection burden for small business concerns with fewer than 25 employees."

Needs and Uses: On February 28, 2020, in furtherance of the goal of releasing more mid-band spectrum into the market to support and enabling next-generation wireless networks, the Commission adopted a Report and Order, FCC 20-22, (3.7 GHz Report and Order), in which it reformed the use of the 3.7-4.2 GHz band, also known as the C-band. Currently, the 3.7-4.2 GHz band is allocated in the United States exclusively for non-Federal use on a primary basis for Fixed Satellite Service (FSS) and Fixed Service (FS). Domestically, space station operators use the 3.7-4.2 GHz band to provide downlink signals of various bandwidths to licensed transmit-receive, registered receive-only, and unregistered receive-only earth stations throughout the United States.

The 3.7 GHz Report and Order calls for the relocation of existing FSS operations in the band into the upper 200 megahertz of the band (4.0-4.2 GHz) and relocation of existing FS operations into other bands, making the lower 280 megahertz (3.7-3.98 GHz) available for flexible use throughout the contiguous United States through a Commission-administered public auction of overlay licenses that is scheduled to occur later this year. The Commission adopted a robust transition schedule to achieve a prompt relocation of FSS and FS operations so that a significant amount of spectrum could be made available quickly for next-generation wireless deployments. At the same time, the Commission sought to ensure the effective accommodation of relocated incumbent users. To facilitate an efficient transition, the Commission adopted a process for fully reimbursing existing operators for the costs of this relocation and for offering accelerated relocation payments to encourage a timely transition. Flexible-use licensees will be required to pay any accelerated relocation payments, if elected by eligible space station operators, and reimburse incumbent operators for their actual relocation costs associated with clearing the lower 300 megahertz of

the band while ensuring continued operations for their customers. The 3.7 GHz Report and Order establishes a Relocation Payment Clearinghouse to oversee the cost-related aspects of the transition and establishes a Relocation Coordinator to establish a timeline and take actions necessary to migrate and filter incumbent earth stations to ensure continued, uninterrupted service during and following the transition.

FCC staff will use this data to ensure that 3.7-4.2 GHz band stakeholders adopt practices and standards in their operations to ensure an effective, efficient, and streamlined transition. Status reports and other information required in this collection will be used to ensure that the process of clearing the lower portion of the band is efficient and timely, so that the spectrum can be auctioned for flexible-use service licenses and deployed for next-generation wireless services, including 5G, as quickly as possible. The collection is also necessary for the Commission to satisfy its oversight responsibilities and/or agency specific/Government-wide reporting obligations.

The Commission concluded in the 3.7 GHz Report and Order that a Relocation Payment Clearinghouse and Relocation Coordinator are critical to ensuring that the reconfiguration is administered in a fair, transparent manner and that the transition occurs as expeditiously as possible. To accomplish these goals most effectively, the Commission is seeking approval for a new information collection to collect information from the Relocation Payment Clearinghouse, the Relocation Coordinator, and incumbent space station operators and allow the Relocation Payment Clearinghouse and Relocation Coordinator to collection information to ensure that the band is transitioned effectively.
